Completed 12th standard (Computer Science) with 92.7 %

PROJECTS

Student Management System

- Developed a Java-based student management system for efficient record tracking.
- Implemented CRUD operations (Create, Read, Update, Delete) for seamless data management.

Simple Blogging Platform

- Built a full-stack blog platform using Node.js, MongoDB, HTML, CSS, and JavaScript.
- Designed a responsive UI (Bootstrap) for an enhanced user experience.

AI-Powered Phone Recommendation System

- Engineered an AI-driven phone recommendation system using Python, Scrapy (Web Scraping), React, Node.js and MongoDB.
- Integrated DeepSeek-R1-Distill-Llama-70B-free version from TogetherAI.
- Automated real-time data scraping and updates using **GitHub Actions** for continuous database refresh.
- Deployed and managed the full-stack application on **AWS EC2** for scalable and reliable cloud hosting.

SKILLS

Programming Languages:
Python, Java, C, JavaScript

Databases: MongoDB, MySQL

Frameworks: Node.js, React, TailwindCSS

Development Practices: Agile Methodologies, Version Control (GitHub)

Soft Skills: Problem Solving, Team Collaboration, Effective Communication
